

Advancing Responsible And Sustainable Mining Through Circular Design.

Mining is central to a decarbonised world—but with climate regulation and performance requirements accelerating, the industry must lead in decarbonising its full value chain.

Bradken plays a vital role across this chain, and through circularity initiatives and decarbonisation efforts, we're committed to reducing emissions, extending product performance, and driving sustainable transformation.

Mill Liners That Do More—With Less.

Energy Sourcing

75%

of all the energy required to manufacture our mill liners is now sourced from renewable resources e.g. wind, solar, hydro*.

Mill Liner Castings Recycled Material

>98%

of all the materials used in the making of our mill liners are from returned liners and recycled materials*.

Progressing together towards SDG 12 (responsible production) and SDG 13 (climate action).

Partner with Bradken® to close the loop on your mill liner lifecycle.

Our Innovation. Your Advantage.
