

MillSafe™ Mill Liner Bolting System

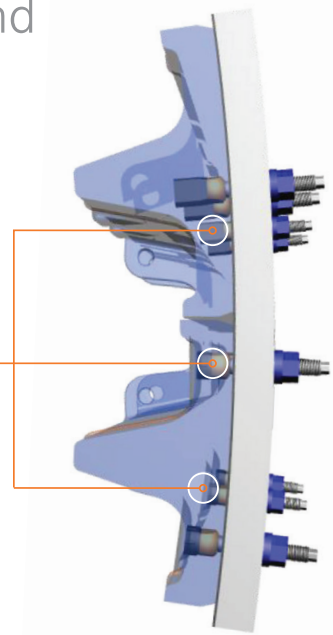

Bradken's MillSafe™ bolting system is a safe and fast solution for liner installation and removal. Install your liners by bolting them from outside your grinding mill.

The MillSafe Bolting System:

- Is suitable for AG/SAG/BALL mills
- Comes in metric and imperial grades of bolts
- Uses the Bradken Spherical Head design for maximum head contact
- Has positive bolt head seating with freedom of movement and self-alignment
- Eliminates point & line loading over traditional oval head bolts
- Liner placement is aided with Liner Location Stripes

MillSafe Bolting

Product Overview

Superior Design

The MillSafe bolting system uses the Bradken Spherical Head Bolt design to provide optimal contact between bolt and casting. The bolt hole design also accommodates for misalignment between bolt, liner and mill shell.

Reducing Cost & Increasing Productivity

The bolting system combined with Liner Location Stripes (LLS) is safe and fast for liner installation and removal, allowing liners to easily separate from the mill shell once the bolt studs are removed from the outside.

Safe Application

Increased safety by bolting liners from outside the mill and removing people from the dangerous zones inside a grinding mill during mill relining.
