

Hydraulic Excavator Undercarriage

Machine compatibility;
PC3000, PC4000, PC5500,
PC7000, PC8000

Bradken has a proud history of specialising in the design and manufacture of superior performing undercarriage for Large Mining Hydraulic Excavators (HEX) and Electric Rope Shovels (ERS), direct to customers around the globe. Bradken's innovative range of undercarriage for Komatsu® hydraulic excavators offer proven capability, increased service life, and enhanced reliability.

Proven Capability

Customer focus, rigorous design, expert metallurgy and materials engineering, and state-of-the-art manufacturing processes are combined by Bradken to deliver our customers undercarriage products that consistently outperform the OEM and other aftermarket competitors.

Increased Service Life

Bradken's crawler shoes for Komatsu® HEX undercarriages were deliberately designed with Bradken's proprietary through hardened material. Used on these machines, the allowable wear envelope allows Bradken's through hardened shoes to deliver increased service life and reduced safety risks associated with deformation, spalling and cracking.

Reliability

Bradken's crawler shoes for Komatsu® HEX undercarriages feature Bradken's patented 'Pillar of Strength' and other design enhancements providing superior strength and support to critical areas. Bradken's crawler shoes deliver consistent and dependable performance, especially in the worn condition and under extreme applications, giving our customers the confidence to schedule condition-based maintenance while minimising the risk of unplanned downtime events.

Interchangeability

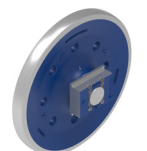

Bradken undercarriage components are fully interchangeable with OEM components and compatible with OEM installation requirements. Our customers have the security of Bradken warranty support even when Bradken components are installed alongside competitor components.
