

# Sustainability Policy

London City Airport (LCY) aims to operate in a sustainable and responsible way, by minimising as far as possible the environmental impacts resulting from its operations whilst maximising social and economic benefits. LCY aspires to be an industry leader in sustainability, promoting excellent standards and continual improvement across the business. One example of this is our commitment to achieve net zero carbon emissions by 2050.

***In order to achieve this objective, LCY commits to:***

- Ensuring LCY's environmental and sustainability activities are safe for its employees, passengers, local residents and others who interact with the airport
- Assessing the potential environmental impacts of all operations and continually seeking to remove or mitigate these impacts wherever possible
- Monitoring political, scientific and technological developments to ensure LCY's activities remain at the forefront of the sustainability agenda
- Complying with all relevant environmental legislation and other requirements to which the airport subscribes, and seeking to exceed these requirements where possible
- Taking a pro-active approach to continual environmental improvement, particularly with regards to carbon, noise, air quality, pollution prevention, biodiversity, the use of resources, water, waste minimisation and recycling
- Continuing to deliver and improve LCY's economic and social impact initiatives
- Developing, implementing and reviewing sustainability objectives, targets, strategies and action plans in order to achieve continuous improvement
- Providing employees with adequate training and resources, so they have a clear understanding of responsibilities with regards to sustainability, and are competent and able to assist in the delivery of LCY's environmental management system and community engagement activities
- Reporting transparently on sustainability performance to all employees as well as interested external parties
- Collaborating with its service partners to operate in compliance with their regulatory obligations and encouraging the adoption of industry best practice
- Communicating this policy to all persons working for or on behalf of the organisation and making the policy publicly available
- Undertaking a review of this policy, the environmental management system and LCY's sustainability activities at least annually to ensure they are fit for purpose, deliver on future sustainability needs and uphold LCY's values.

This Sustainability Policy encompasses those business activities, services and locations under the control of LCY, and is given effect through an environmental management system that meets the requirements of ISO14001:2015. Every person working for LCY has a responsibility to ensure that sustainability is integrated into every aspect of the organisation. If you have any questions or comments, please contact the environment team at [environment@londoncityairport.com](mailto:environment@londoncityairport.com)
