

OUR ROLE IN THE COMMUNITY

Dear Neighbour,

My name is Aaron Uthman and I am an employee at London City Airport. As the Community Relations Ambassador, I will be your central point of contact at the airport.

I am writing to provide you with an update on London City Airport's development programme. In this leaflet you will find information about the preparatory works that have been taking place as well as a timeline for upcoming activities. As your responsible neighbour the airport remains committed to take the necessary steps to ensure that you are informed on construction activities. LCA has a local Facebook and Twitter page which is community focused and will be used as a platform to engage in conversation. Information will be available on these platforms as well as on our website and the London City Airport Consultative Committee website. I am also reachable every second and last Monday at the North Woolwich library for you to discuss any concerns you may have or ways we can work together.

City Airport Development Programme 2018

What is the City Airport Development Programme?

In July 2016, the Government granted permission for the City Airport Development Programme (CADP) which will allow us to improve the current airport infrastructure by building:

- 8 new aircraft parking stands to welcome next generation aircraft which are quieter and more fuel efficient
- A parallel taxiway to make the use of the runway more efficient
- An extended terminal building to accommodate our passengers
- 1600 new permanent airport jobs
- 500 additional jobs during construction period

CONSTRUCTION PROGRESS

As part of the expansion programme, we have now completed the following preparatory works:

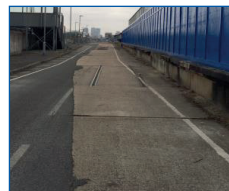

1. The erection of a temporary noise barrier to reduce construction noise impacts on the local community. (25/10/17-8/12/17)
2. The installation of a new habitat for fish in King George V Dock. (25/10/17-11/12/17)
3. The demolition of a single concrete platform in King George V Dock to make way for the installation of a new deck over KGV Dock upon which the terminal extension and new aircraft stands will be built. (28/11/17-17/3/18)

UNEXPLODED ORDNANCE (UXO)

As part of the works to clear the dock bed ahead of the piling and decking contract, an unexploded ordnance (UXO) from WW2 was discovered on 11 February.

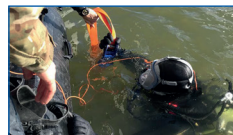

This required the implementation of a 214m cordon around the device, which resulted in the closure of the Airport and the DLR station and required the evacuation of some local residents. The airport worked very closely with the Met Police, Royal Navy divers and London Borough of Newham (LBN) to safely remove and dispose of the device. Work clearing the dock bed continues and it is possible another device could be discovered.

The airport would like to thank the community for understanding the seriousness of the situation and cooperating with the London Borough of Newham and Metropolitan police during the excavation of the ordnance.

The airport has taken on board some of the feedback received from local residents following the incident. Feedback was largely positive which naturally included some areas of communication that needs improving. An agreed action point was to have information available via the London City Airport Consultative Committee website and also #LCYlocal Facebook and Twitter pages.

The ordnance which was found at the airport was 500kg and is the 3rd one from left to right.

WHAT'S COMING UP:

Below you will find an update on some of the works that will be taking place over the next quarter.

1. **Forecourt works** will take place in April in order to facilitate terminal construction. The existing forecourt and short stay carpark will need to be adjusted to prepare for piling. The interim forecourt **will not affect TFL bus services** however there will be changes to the bus stop location and access route to the DLR station. Start date – April 20th 2018–September 2018.

From mid-June 2018, for approximately 3 weeks – 1. Revised Taxi, Drop-off and Bus entrance
2 Pickup location accessed from new ramp access off Hartman Road.

From early July 2018, for approximately 4 weeks – 1. Revised Taxi entrance and exit

2. **Piling and Decking** will be taking place on the 25th of June 2018. London City Airport has awarded a contract to BAM Nuttall for the new 75,000 m2 concrete deck extension. The deck is an important first stage of construction, as part of the £480m City Airport Development Programme, supporting new infrastructure including aircraft stands, a parallel taxiway and a world-class passenger terminal extension.

→ Start date – 25 June 2018 and completion date – end of February 2020

→ What is the possible impact? **Visually** you will see two piling rigs in the King George V Dock which will do the piling in the dock. **Noise** as part of the pre commencement conditions we have noise monitors which will measure the noise being emitted during the piling. We have a vibration limits agreed

and will be working closely with the London Borough of Newham (LBN) and will monitor to ensure compliance. **Delivery** of materials will be scheduled and reviewed to ensure that there is minimal impact on the local roads. Deliveries will also be made via barge.

→ **Working hours** – As this activity requires work adjacent to the operating runway; some activities will take place at night and during non-operational hours of the airport at weekends. We will seek to minimise the use of these non-operational hours and, as above, will ensure compliance with the agreed noise and vibration constraints agreed with LBN.

If you do experience any type of disturbance during the works we have a 24hr phone number 02038580261 and a dedicated email address community@londoncityairport.com

London City Airport's activity in the area

- Education – STEM in aviation** - A total of 214 secondary school students from schools in East London Including local schools; Kingsford, Oasis and Royal Docks participated in our flagship educational event. This event aims to give young East Londoners insight in the application of science and technology in the aviation industry and to inspire them to choose Science, Technology, Engineering and Math's (STEM) subjects in school. The next STEM event will take place on the 8th November 2018.
- Community Engagement** – London City Airport sponsored the Royal Docks Biodiversity events which took place in April across North Woolwich, Silvertown and West Silvertown.
- Community Investment – Volunteering** – Richard House Children's Hospice - Richard House is a charity located in Beckton (Newham) and they provide care and respite for children with life limiting conditions and diseases. Since the beginning of the partnership we have raised over £950,000 for the hospice.
- Community Fund** – In August this year London City Airport will be launching its community fund which will provide annual contributions of £75,000 for various community projects. A board of trustees will be formed and will include the chair of the LCACC. Terms and conditions and process are being developed and will be shared.
- Employability – Take off into Work (TOIW)**: This flagship local employment scheme provides Newham residents over the age of 18 with a variety of training, work experience and first-hand access to onsite job opportunities. In total 665 people have been employed through this programme, 68 Newham residents gained employment through the programme in 2017.
