

Infos & Facts

About Xayn	<p><u>Xayn</u> is a European research-based AI company based in Berlin developing privacy-protecting and energy-efficient AI personalisation for businesses. Their Small Language Model Xaynia leverages Natural Language Processing and offers business clients across different industries personalised semantic search and recommendations at scale.</p> <p>Xayn started as a research project at the University of Oxford and Imperial College London by Leif Nissen Lundbæk, PhD, and Professor Michael Huth. Together with Felix Hahmann, they founded the tech company in 2017. To this day, that academic vision remains with a workforce comprised of more than 30% PhDs. The start-up has received investment funding of 19.5 million EURO from Global Brain Corporation, KDDI Open Innovation Fund, Earlybird as well as Dominik Schiener. Xayn has worked with corporations such as Porsche, Daimler, Deutsche Bahn, und Siemens.</p>
