

From the quiet landscapes of Bern, Switzerland, a young producer named Seraja Hilbrecht began shaping sounds that would one day echo across the world's biggest hardstyle stages. Between 2016 and 2017, Cyber took to the stages of Defqon.1, Reverze, Decibel Outdoor and more, winning over massive crowds with his euphoric energy. His sound reached far beyond Europe, with performances in Australia, Japan and South Korea, helping spread the melodic wave to new corners of the world.

After stepping away from live performances for several years, Cyber made a powerful return to the stage in 2023 at Melodic Madness, which was met with widespread enthusiasm from fans and industry peers alike. Cyber's next chapter isn't just a return: it's a revival of emotion in motion.

As hardstyle embraces a renewed wave of melodic influence, Cyber stands at the forefront of its evolution. His creative mission for 2026 is to elevate euphoric hardstyle to the biggest stages all over the world.
