---

Hi [redacted]

Hope you are well.

We were signposting one of our research suppliers to your website for some resources for some qual work we are currently undertaking and noticed that you are quoting one of the stats from the 2023 Young People and Gambling Questionnaire on your homepage:

This statistic is misquoted as its 43% of 11-13 year olds who have experienced gambling in the last 12 months (not necessarily spent their own money on gambling). The percentage of 11-13 year olds who have spent their own money on gambling in the last 12 months (defined as active involvement in gambling) is actually 27%.

Please could we ask you to update your website?

Kind Regards

[redacted]
