

Exenta SFC, an Aptean Fashion
Software Solution

Streamline Your Shop Floor Operations

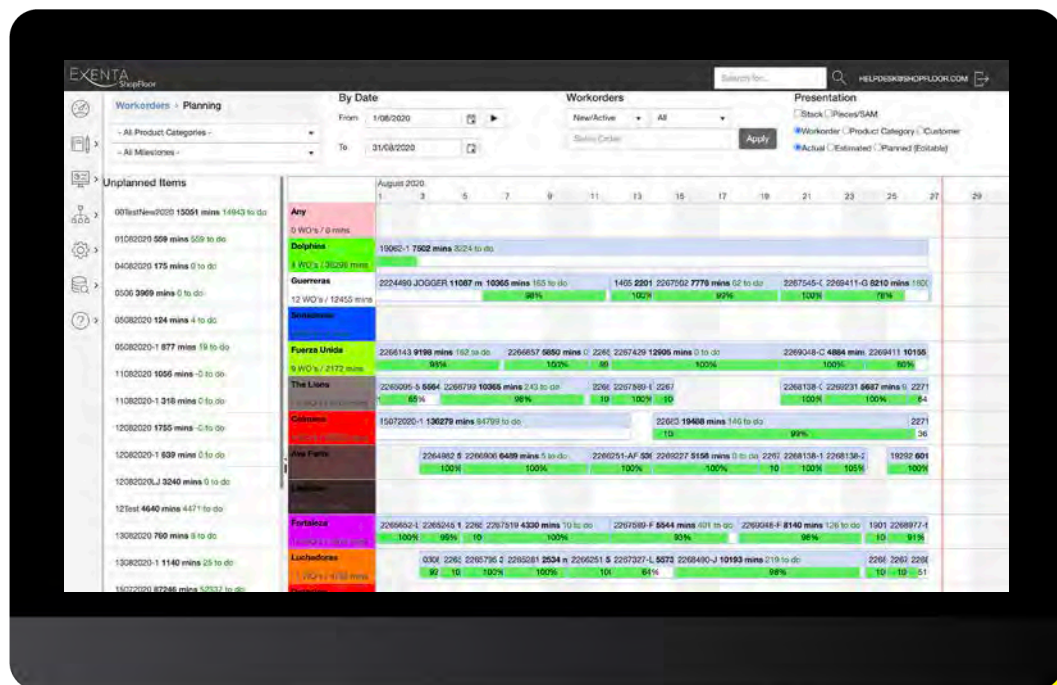

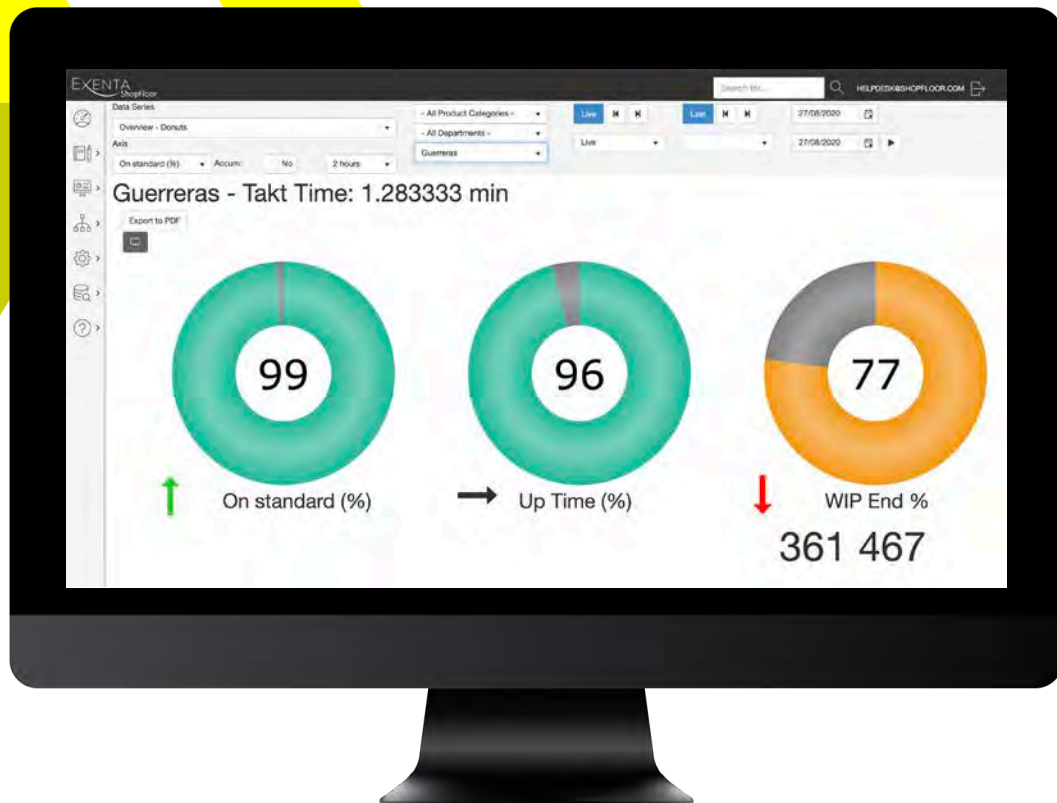

Boost performance on the shop floor
with a revolutionary manufacturing
execution system.

Exenta Shopfloor Control is the most modern manufacturing execution system available. Real-time visibility and control allow manufacturers to drastically reduce manual data entry on the shop floor, improve quality and achieve accurate inventory management.

Benefits of Exenta SFC Proven to Deliver ROI:

- › Increase productivity and efficiency
- › Reduce throughput time
- › Improve visibility and control
- › Manage costs and quality
- › Reduce absenteeism
- › Minimize off-standard time

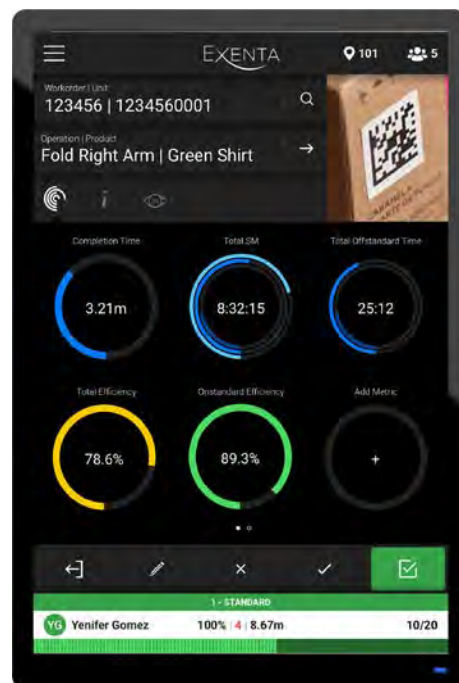

Exenta SFC provides a constant view of all activities happening on the shop floor in real-time. Managers and workers alike receive performance reports to help improve efficiency and quality control on the shop floor.

“Exenta Shopfloor is amazing! The interface is so clean and clear that it is easy to implement and adopt. Even the less tech savvy operators have embraced it easily and enjoy using it, which has translated into higher job satisfaction and a 10% increase in productivity in the first month alone. We also had a significant return on undocumented reduction in administrative time. Previously, we were manually tracking our inventory and entering incentive pay, now that is all done automatically.”

Carrie Bovender, CEO and Owner, Grand Forest

“With Exenta shopfloor control, Carhartt achieved an average efficiency increase of 13% overall. We were expecting between 8 to 10%, so it exceeded expectations. We got to a higher level, and we got there quicker than I was expecting. We weren’t even through the fifth or sixth line in the pilot and Exenta was already showing us efficiency improvements of the early pilot lines. It was really great.”

Katrina Agusti, VP Solutions Delivery, Carhartt

Key Features

- › **Real-time data collection** using Android devices with wireless networking and an easy-to-use web-based management dashboard.
- › **Automatically calculate** payroll with a 3rd party payroll service and a solution that supports individual and team incentives.
- › **Plant floor visibility and control** with order (WIP) tracking, line balancing tools and advanced production planning.
- › **Worker performance feedback** increases individual and team productivity using pacing and motivational tools and document delivery of any file type.
- › **Off-standard time accounting** tracks training progress with alerts and approvals for all off-standards and pay/off-standard code management.
- › **Quality control features** make it easy to identify/manage quality issues by providing visual control with pictures and quality performance reporting.

Increase Efficiency and Empower Your Workers on the Shop Floor

Today's price-sensitive and time compressed global business environment is more competitive than ever. Brand and contract manufacturers of every- thing from fashion apparel to industrial sewn products face constant pressure to reduce costs, improve quality and speed deliveries. With little room for errors and delays, they must constantly stay on top of the status of each order, individual and team productivity, and any off-standard events can make the difference between on-time delivery and chargebacks; profit and loss.

By removing traditional infrastructure requirements and adopting Internet of Things (IoT) technologies for the factory floor, Exenta Shopfloor Control puts real-time plant floor management within the reach of a broader range of manufacturers than ever before.

Product Statistics

- › Productivity Increase of 20-55% (based on real clients and real results)
- › Reduce maintenance costs by up to 50%
- › Reduce machine downtime by up to 40%
- › Increase forecasting accuracy by 85%
