Complex style, color and size variations make apparel inventory a moving target. Add months-long supply chains and product life cycles that can end in a single season, and the math is unforgiving. If you get planning wrong, you face stock-outs that stall sales or excess stock that's cleared in margin-killing markdowns.

Aptean Fashion & Apparel puts you back in control. It's a purpose-built ERP that brings a SKU Matrix and smart allocation SKU matrix and smart allocation logic keep supply aligned with lightning-fast demand shifts, while an AI-powered platform, AppCentral, connects the applications your team uses most—from product development to the warehouse to finance—in one trusted hub.

Benefits

- Simplify complex SKUs with style-season-color-size management
- Prevent stock-outs and overstock with smart allocations
- Make decisions and execute faster with AI-native application and AI Agents
- Streamline work across solutions with a platform of seamlessly interoperable applications
- Scale confidently with an ERP built on Microsoft Dynamics 365 Business Central

The screenshot displays the Aptean Fashion & Apparel workspace on AppCentral. The main interface shows a style card for a red dress (ST00006). The card includes fields for General (Code, Description, Item Template Code, Item Category Code, Base Unit of Measure, Division Code, Division Name, Season Code, Season Name), Costs & Posting (with a table for color codes and descriptions), and Pictures (showing a red dress). To the right, a pie chart visualizes product quantities, with a tooltip for a specific product (ST00003-BLACK, STANDARD CREW TEE Black, Total Quantity On Hand: 9675). A summary panel shows the top 5 products by quantity.

Industry Depth Meets AI Power—All in One Platform

Aptean Fashion & Apparel weaves in decades of fashion know-how into every transaction, then supercharges it with Aptean Intelligence and the AppCentral ecosystem. The result is a single, AI-ready workspace that can execute in step with the pace of style—so you can spend less time juggling systems and more time growing your brand.

- **Designed for fashion and apparel** – The built-in SKU matrix and smart allocation rules keep even the most complex assortments profitable and perfectly positioned.
- **AI turns data into direction instantly** – GenAI Query, predictive models and AI agents surface answers and automate routine work, freeing your team for high-value activities.
- **AppCentral connects every workflow** – Pre-integrated ERP, PLM, EDI, payments and shipping apps share a unified platform, eliminating silos and prevents manual re-keying.
- **Microsoft underpins future-proof scale** – Built on Dynamics 365 Business Central, Aptean Fashion & Apparel stays secure, familiar and ready to grow alongside your business.

Aptean Intelligence

AI That Works the Way Fashion Moves

Aptean Intelligence is AppCentral's built-in AI that turns data into direction. It automates workflows, deploys rolebased agents flags trends before they become bottlenecks and more, so your team creates instead of calculates.

- **GenAI Query** – Ask anything about your operations and get instant answers and dive into details with follow up questions.
- **AI Agents** – Put AI to work across your operations: Automate repetitive tasks like quoting, order processing and inventory tracking.
- **Intelligent Workflows** – Automate and streamline cross-functional workflows, so you can focus on the strategic work that drives the business forward.
- **Role-based AI Workspaces** – Give every user a command center personalized for their role. Bring together data, applications and agentic AI assistants so your team can perform at their best.
- **Predictive Intelligence** – Make proactive, confident decisions using predictive AI agents to see emerging trends and potential risks.

AppCentral

All Your Apps, One Hub

AppCentral is your AI-powered hub for all your work. It unifies every mission-critical application you need and activates a fabric of embedded AI agents across your organization, eliminating the need for constant switching between applications.

- **Enterprise Resource Planning** – Link orders, inventory, production, billing and finance in one place.
- **Product Lifecycle Management** – Streamline concept-to-tech-pack and accelerate time-to-market.
- **Shipping Automation** – Automate your fulfillment process, to ship faster, smarter and with fewer errors.
- **Electronic Payments** – Get paid faster with automated invoices and a simple, secure payment portal.
- **Invoice Automation** – Streamline your AP processes by leveraging AI to automate invoice, purchase order and receipt matching.

Key Features

- **Style Management** – A single record links every design detail, cost and sales figure so teams stay aligned and approve new garments faster.
- **Season / Division / Color / Size** – Clear tags let planners view stock and sales at any level, spot slow movers early and place smarter reorders.
- **Style Costing** – Live cost rollups flag margin problems while designs are still on the screen, giving merchandisers time to adjust fabrics, pricing or suppliers.
- **Credit and Hold Management** – The system checks outstanding balances before release and can stop new shipments to late-pay customers, protecting cash flow without manual review.
- **Electronic Data Interchange** – Retailer purchase orders, ship notices and invoices move straight between systems, trimming chargebacks and speeding payment.
- **B2C eCommerce Integration with Shopify** – Automatic sync of products, prices, stock and orders keeps the site accurate and lets the warehouse ship the same day.
- **B2B eCommerce Integrations with NuOrder and Joor** – Wholesale catalogs publish with live stock and confirmed orders flow back into the system, cutting out spreadsheets and back-and-forth emails.
- **Stock Reservation** – Reserve fabrics and textiles across future plans and specific orders to align production schedules and meet customer commitments.
- **Season Booking** – Confirm seasonal bulk contracts and auto-deplete quantities as in-season orders arrive to boost accuracy and on-time fulfillment.
- **Demand-Driven Purchase Recommendations** – Generate buy suggestions from sales, forecasts and inventory positions to prevent stock-outs and excess.
- **Business Intelligence** – Configurable industry dashboards connected across Aptean apps, for business-wide insights.
- **Finance & Accounting by Microsoft Dynamics 365 Business Central** – Comprehensive AP/AR/GL with financial reporting and statements, cash management and bank reconciliation, multi-entity consolidations, multi-currency and much more for faster close and consistently accurate financials.
