# Empower Your Food and Beverage Business With AI

△ aptean Ready for What's Next, Now®

The fact that **Aptean Food & Beverage ERP** is built on Microsoft Dynamics 365 Business Central allows our customers to benefit from the **native integrations, full configurability, reliable cloud hosting** and **best-in-class cybersecurity** that the platform offers.

But now, there's even more to love about our partnership with Microsoft. Thanks to the addition of **Copilot** and **Azure extensions**, users can now **leverage robust AI functionalities alongside the industry-specific technology** that only our solution provides.

These powerful features save valuable time and empower smarter, faster decision-making—helping your business stay ahead of the competition in a dynamic industry.

Marketing Text Suggestions

Auto-generate marketing content in seven languages based on item attributes.

Chat With AI Assistant

Use conversational language to pinpoint critical data and self-serve support.

Assisted Analysis

Conduct data analysis by instructing the system with natural language or prompts.

Sales Line Suggestions

Optimize sales orders based on customers' expected purchase patterns.

Bank Account Reconciliation

Supplement existing transaction automatch functionality with suggestions.

eDocument Mapping

Map invoices and match to purchase orders with greater accuracy.

Sales and Inventory Forecast

Predict potential sales and stock-outs, then auto-generate replenishment orders.

Cash Flow Forecast

Create projections for future revenue based on receivables, payables and taxes.

Late Payment Prediction

Identify expected late payments for outstanding sales invoices.

Power Automate Flows

Chat with Copilot using natural language to create Power Automate flows.
