

Aptean Industrial Manufacturing ERP
Intuitive Edition

Enterprise Resource Planning for Discrete Manufacturers

Aptean Industrial Manufacturing ERP *Intuitive Edition* gives discrete manufacturers greater visibility into all areas of their business. With end-to-end support for your production, inventory, financial, quoting and support processes, *Intuitive Edition* streamlines your operations and helps you identify opportunities for cost savings and efficiency improvements. And with user-friendly business intelligence features, you can access key information when and where you need it for faster, more accurate decision making.

Seamless Integration of Critical Data

Aptean provides complete quote-to-cash functionality, allowing you to seamlessly integrate critical data across your enterprise, from daily operations to the strategic level.

- ▶ **Enterprise Resource Planning (ERP)** – A flexible toolset for forecasting, master scheduling, engineering management, inventory management, quality control, quoting, finance and more.
- ▶ **Customer Relationship Management (CRM)** – Manage customer information, opportunities, marketing campaigns and support incidents on a single platform while ensuring alignment with the financial and order processing data in your ERP.
- ▶ **Business Intelligence** – Access the critical data you need for fast, informed decision making. Monitor performance, identify trends, display KPIs, and configure reports based on your specific requirements.
- ▶ **Extended Enterprise** – Seamlessly support operations at a single location, multiple plants, or across international borders. Leverage multi-currency capabilities, full support for VAT taxes, and translatability into any language at the user level.

Key Features

- › **Planning** – Analyze material requirements, react to scheduling issues, and make accurate delivery commitments with dynamic available-to-promise (ATP) and capable-to-promise (CTP) tools
- › **Engineering Management** – Create visual bills of material, generate and maintain flexible routings, track engineering changes, and manage product lifecycles
- › **Inventory Management** – Control inventory transactions, product costs, material usage, and track material location/lot information and multi-level serial numbers; all cradle-to-grave
- › **Demand Forecasting** – Generate forecasts automatically, or leverage the system’s diagnostic tools and models to generate forecasts yourself
- › **Quality Control** – Support complete inspection procedures; from raw materials, to work-in-process, to customer returns
- › **Incident Management** – Create detailed records of support incidents, calculate costs associated with resolution, track warranties, and manage service contracts

Additional Capabilities

- › **Shop Floor Data Collection** – Implement barcoding to automate entry of data from receiving, shipments, inventory transactions, labor reporting, label generation and RFID
- › **Aptean CADLink** – Eliminate redundant data entry and streamline product development by integrating Intuitive with your CAD design system. Supports SolidWorks, Solid Edge, Autodesk Inventor and more
- › **Advanced Quality by uniPoint** – Track the cost and frequency of quality events, initiate non-conformances and corrective preventative actions, manage maintenance for ISO compliance, and track HazMat documentation so you’re always prepared for an audit
- › **Aptean Analytics** – Discover and share business insights with pre-built dashboards and reports that provide insights into your operations and drill-down intelligence into KPIs and root causes
- › **Aptean Event Management Framework** – Enhance communication with customers, vendors and internal staff by automating routine and exception-based email and text message notices
