

**Aptean Distribution ERP**

# Modernize Your Business Using SaaS Environment

## Realize the Benefits of Cloud Based ERP

The Aptean Cloud provides consumer goods importers and distributors with a complete and compelling ERP solution backed by the security, flexibility and scalability of a SaaS model. We deliver all of the industry leading capabilities you need without the challenges of a traditional on-premise deployment.

- › **Reduced Costs** - Remove the high cost of hardware and labor that come from running your own data center, and avoid unplanned expenses with defined, predictable costs
- › **Access Anywhere** - Provide your users with greater flexibility by enabling them to access your ERP securely, wherever they have an internet connection
- › **High Availability** - Always on, always available – Aptean’s SLA guarantees 99.9% uptime via the Microsoft Azure platform
- › **Increased Security** - Your solution is accessible through our secure and monitored online environment for maximum protection against a breach of your data
- › **Disaster Protection** - Your data is backed up, and always available even if your facilities suffer from a natural disaster, hardware failure or other unfortunate event
- › **Support Growth** - Our scalable model allows you to dynamically add computing power and capacity as you grow, instead of paying now for your future needs

# Robust, Secure Hosting for your Aptean Distribution ERP Infrastructure

Powered by Microsoft Azure, the Aptean Cloud delivers the rich features you need in a secure environment that is trusted by 95% of the Fortune 500. All of the information and insights you require are delivered through a complete and compelling user experience allowing you to focus on managing and growing your business.

## Key Features and Benefits

- › **A Trusted Platform** – Microsoft Azure features embedded security across the broadest global footprint and the largest compliance portfolio, with enterprise-grade SLAs, and industry-leading support. Aptean leverages segmentation and volume encryption to provide you with the highest degree of data security, as well as reliability and flexibility.
- › **No On-Premise Servers** – A move to the Cloud means that you can eliminate costly hardware purchases and hardware upgrades, along with the license costs for database and operating systems. You'll also avoid the high cost of in-house technical expertise to maintain that hardware.
- › **Downtime Loss Avoidance** – When on-premise systems are down it's not just hardware that's not running, it's the whole company. A 99.9% uptime guarantee insures against potentially huge losses including wages and salaries, production downtime, reduced customer service levels and more.
- › **Managed Tech Services** – Experienced Microsoft and Aptean experts handle upgrades, health checks, and code deployments to take the burden off your internal IT infrastructure, saving you time, money and resources while reducing risks.
- › **Managed Upgrades** – Unlike a typical subscription model, you can stay current on your own schedule to manage changes and mitigate the disruptions that come with a new release upgrade.
- › **Performance Optimization** – Your system is kept finely tuned for speed and performance so that it can scale without interruption. You benefit from maximized productivity, even as your database and usage grow.

Aptean Distribution ERP is designed to elevate operations for consumer goods importers and distributors. Beyond its transformative tools and capabilities, the integrated design connects departments, data and processes. Altogether, Aptean Distribution ERP will deliver the precise control, clear visibility and fluid workflow needed to take your business to the next level.
