

Aptean Process Manufacturing OEE
Track, Monitor and Measure Productivity

Run Your Plant Simpler, Smarter & More Strategically

Process manufacturers need deeper insights into their production lines than ever before, and changeovers must be streamlined to optimize availability, performance and quality across every batch. Wouldn't it be nice to have comprehensive, real-time visibility over your production to reduce the risk of waste, avoid rework, pin-point any snags in your process and improve consistently?

Aptean Process Manufacturing OEE (Overall Equipment Effectiveness) brings together all the operations and quality production line that can bridge operations, quality, continuous improvement and maintenance to help deliver results quickly. Easily integrated into existing ERP, Aptean OEE satisfies your need for real-time performance management, improvement plans, analytics and paperless quality compliance.

Aptean Process Manufacturing OEE cloud software combines sensor data including weight, quantity and temperature, with advanced software, to measure performance real-time across shifts, lines and equipment. By providing insights into your full production system, Aptean OEE gives process manufacturers the ability to understand and continually improve their systems with the following integrated features.

Key Benefits

- › **Rapid ROI** - ROI in months instead of years with an average efficiency improvement uptick of 5-10% per plant and year for both capacity and labor savings.
 - › **Real-Time and Accurate Production Visibility** - Anything that can be measured by a sensor or provides a digital or analog output can be recorded into Aptean OEE, ensuring real-time and accurate visibility into what is causing the downtime.
 - › **Holistic View of Performance** - Easy-to-use dashboards allow you to quickly see and analyze production and quality data by product, line, shift, crew, asset, event/stoppage reason and plant.
 - › **Support for External Device Connections** - Provides the expertise you need to connect to external devices for accurate measurements.
