

DHL Supply Chain Pharmaceutical

enhances healthcare supply chain efficiencies with Aptean Routing & Scheduling

Industry

Third-Party Logistics

Challenges

- » Large volume of healthcare and life science service users
- » Strict regulations and quality standards to meet and adhere to
- » Outdated IT systems

Benefits

- » Better tracking of status and origin of stock
- » Full control of the supply chain to ensure better efficiencies
- » Compliance with legal requirements within the healthcare sector

The success of DHL Supply Chain is impressive. The reason is two-fold: their remarkable efficiency and high level of industry specialization. Both of which are key to their success in the healthcare logistics marketplace.

With users like Janssen, Cilag, Smiths Portex, GSK, Roche, Boehringer Ingelheim and Pfizer – DHL Supply Chain have certainly achieved its aim of becoming a leading supplier in the sector; and is a title they're proud to claim.

“The strict regulations and quality standards of the life sciences and healthcare market is no problem for DHL.”

Nigel Underwood, CIO, DHL Supply Chain

Their success in achieving this has also been improved since the implementation of Aptean Routing & Scheduling *Calidus Edition*. The software has helped DHL to better enhance its logistics operations and ensure their transportation capabilities within the system are a good fit and can meet the demands of the healthcare sector.

“The capabilities of the system are a **great fit for the demands of the healthcare sector**. This combined with Good Automated Manufacturing Practice (GAMP) validation provides us with a **competitive edge across all our target markets** including pharmaceuticals, medical devices, and consumer healthcare. We count 9 of 10 global pharma companies as system users, along with leading organizations in each of the other sectors.”

Paul White, IS Director of Healthcare, DHL Supply Chain

The outsourcing of logistics services is playing an increasingly important role in the life sciences and healthcare industry. With their extensive industry knowledge, certified facilities and processes, DHL Supply Chain now offers flexible solutions that comply with all legal requirements.

This in part can be contributed to the use of modern, validated IT systems that allows customers to monitor and track the status and origin of all goods in stock. This means DHL can always be in full control of the supply chain. It also allows them to enhance operational efficiencies and ensure they remain a leading supplier to the industry.

“We were **pioneers in validating logistics systems** for healthcare companies and it certainly helped to be working with professionals like Aptean. **This is quite simply a true partnership.**”

Ben Gilkes, Head of IS for Healthcare & Technology, DHL Supply Chain
