

**Aptean EAM**  
*TabWare Edition*  
*Effective Maintenance Solutions*

# Reach New Levels of Asset Efficiency

Maintenance across plants, lines and even individual machines is essential for protecting your bottom line. Any downtime or stoppages can halt production and cost time and money.

A solution that allows you to streamline work orders, free up your technicians to inspect and repair on demand and maintain just the right level of spare parts, will save time, money and reduce maintenance costs.

Aptean EAM is designed by maintenance professionals for maintenance professionals with features you need to get the job done. Our solution is mobile and easy to use for quicker adoption and is easily configurable, eliminating the need for customization.

## Key Benefits

- › **Simplify Processes** – Provides management visibility and operation execution across multiple sites and warehouses and bring the information for analysis and reporting.
  - › **Better Inventory Control** – Optimizes your MRO inventory by ensuring the right parts get to the right place at the right time and lower your overhead costs.
  - › **Increase Technician Efficiency** – Enables mobile work orders, automatic email alerts and review/ approve requests all through smartphones or tablets.
  - › **Real-Time Machine Check-Ups** – Calibrates equipments against all regulatory and audit standards. Performs inspections regulary to maintain assets and extend machine life.
  - › **Easy Resource Management** – Tracks staff and contractor data to assign the right work tasks to the right people at the right time, minimizing unplanned downtime and improving efficiency.
  - › **Decisions Anytime Anywhere** – Sends automatic email alerts when review or approval is needed to keep things moving. Maintenance work requests can be sent real-time through a tablet or smartphone.
  - › **Greater Transparency** – Provides visibility across multiple sites and warehouses while controlling access to data and work processes for staff at each site to make sure only authorized users are making updates.
