

**Aptean Industrial Manufacturing
Overall Equipment Effectiveness (OEE)**
*Cloud-Enabled OEE for Discrete and
Process Manufacturers*

Secure and Reliable Cloud OEE

Modernize Your Business with Comprehensive Cloud-Enabled OEE for Discrete and Process Manufacturers

The Aptean OEE Cloud provides manufacturers in industries such as machinery manufacturing, automotive, wood, food and beverage, plastic and rubber and chemical with a complete and compelling OEE solution backed by the security, flexibility and scalability of a SaaS model. We deliver all of the industry-leading capabilities found in Aptean OEE without the challenges of traditional on-premise deployment.

- › **Reduced Costs** – Remove the high cost of hardware and labor that come from running your own data center, and avoid unplanned expenses with defined, predictable costs
- › **Access Anywhere** – Provide your users with greater flexibility by enabling them to access Apprise securely, wherever they have an internet connection
- › **High Availability** – Always on, always available – Aptean's SLA guarantees 99.9% uptime via the Microsoft Azure platform
- › **Increased Security** – Aptean OEE is accessible through our secure and monitored environment for maximum privacy and protection against a breach of your data
- › **Disaster Protection** – Your data is backed up and always available even if your facilities suffer from a natural disaster, hardware failure, or other unfortunate events
- › **Support Growth** – Our scalable model allows you to dynamically add computing power and capacity as you grow, instead of paying now for your future needs

Key Benefits

- › **A Trusted Platform** – Microsoft Azure features embedded security across the broadest global footprint and the most extensive compliance portfolio, with enterprise-grade SLAs and industry-leading support. Aptean leverages segmentation and volume encryption to provide you with the highest degree of data security, as well as reliability and flexibility.
- › **No On-Premise Equipment** – A move to the Cloud means that you can eliminate costly hardware purchases and hardware upgrades, along with the license costs for database and operating systems. You'll also avoid the high price of in-house technical expertise to maintain that hardware.
- › **Downtime Loss Avoidance** – When on-premise systems are down, it's not just hardware that's not running; it's the whole company. A 99.9% uptime guarantee ensures against potentially huge losses, including wages and salaries, production downtime, reduced customer service levels and more.
- › **Managed Tech Services** – Experienced Microsoft and Aptean experts handle upgrades, health checks, and code deployments to take the burden off your internal IT infrastructure, saving you time, money, and resources while reducing risks.
- › **Managed Upgrades** – Unlike a typical subscription model, you can stay current on your schedule to manage changes and mitigate the disruptions that come with a new release upgrade.
- › **Performance Optimization** – Your system is kept finely tuned for speed and performance so that it can scale without interruption. Benefit from maximized productivity, even as your database and usage grow.
