

**Advanced Configurator for Aptean  
Industrial Manufacturing ERP**

# Quote, Sell and Deliver Complex, Custom-Configured Products

Aptean's Advanced Configurator for Aptean Industrial Manufacturing ERP *Made2Manage Edition* streamlines the quotation and ordering of configure-to-order products. Deliver accurate pricing, product configuration and specifications, as well as bill-of-material and process routings—all generated on-the-fly.

## **Powerful, Easy to Use Configuration Tools**

- ▶ A true “bottom-up” rules-based configurator using a powerful rule and constraint-based guidance engine
- ▶ Web browser-based user interface is logical and easy to understand
- ▶ Easy to maintain, and requires no programming experience or ongoing outside consulting support
- ▶ Out-of-the-box, Advanced Configurator is fully integrated with the sales, inventory, costing and quoting modules of Industrial Manufacturing ERP

## **Visualization Features**

You'll have unprecedented visibility into the configuration process. You'll even be able to see a 2D and 3D-model of the parent item being created as different options are selected. This immediate transparency allows for greater accuracy, reduced order-entry time, and higher customer satisfaction.

## Compress the Quote-to-Delivery Cycle

No need to keep up with every little change you make. Any modifications made to the product will automatically update pricing and design specifications. And collecting critical product data for sales and order-entry functions is simplified, too.

- › Reduce quote cycle time by as much as 80 percent
- › Reduce order entry errors by as much as 100 percent
- › Reduce engineering quote/order support by as much as 50 percent
- › Dramatically reduce time-to-quote and the entire quote-to-production process
- › Increase sales productivity by as much as 50 percent

## Web-Based Execution

Access anywhere there's internet and execute product configuration concurrently or independently in either client/server or "thin web client" environments. A universal set of product configuration rules unilaterally drive configured Bills of Material, Configured Product Routings, Configured Prices, Configured Quote Documents, and Configured Costs.

## Simple Implementation

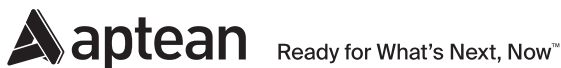

Implementing Advanced Configurator into Industrial Manufacturing ERP is simple. The interface is easy to use and understand. Best of all—you don't need to be a developer to create user-defined rules and configuration settings. What else could you ask for?
