

**Aptean WMS Catalyst Edition**  
*Warehouse Management for Complex Supply Chains*

# Gain Complete Control of Your Warehouse Operations

Managing a warehouse is not an easy task and keeping the perfect balance of inventory, managing inbound and outbound shipping and maintaining productivity can be challenging.

Whether you need support for one site, multi-sites, domestic or international, Aptean WMS *Catalyst Edition* can be configured and scaled to meet your unique supply and distribution demands.

Aptean WMS delivers end-to-end visibility and flexible control over the full scope of your warehouse operations, empowers your team to utilize space more efficiently, improves inventory accuracy and maximizes throughput.

## **Benefits**

- » Reduce labor costs and improve fulfillment
- » Improve productivity in the warehouse with labor and workload management tools
- » Increase shipping accuracy with user friendly loading and shipping features
- » Reduce storage demands and delivery times with advanced cross-dock planning

## Track and Turn Inventory Faster

Aptean WMS helps you more effectively manage your workforce, warehouse and distribution network through:

- › **Receiving** – Electronically receive inbound shipment information, and advanced shipping notices (ASNs), purchase orders and manufacturing orders.
- › **Putaway** – Efficiently utilize warehouse space with configurable putaway strategies, ensure accurate storage with RF-scan validation and automatically direct employees to the best location.
- › **Order Fulfillment and Picking** – Choose from various picking methods – including RF, voice, and paper picking – and use flexible wave planning to align picking activities with order requirements.
- › **Loading and Shipping** – Ensure that the right product is on the right trailer in the right sequence, print compliant shipping paperwork, consolidate shipping containers, maximize cube utilization and more.
- › **Inventory and Workload Management** – Empower managers with real-time reporting on warehouse activity and employee workload along with robust tools for driving inventory efficiency and accuracy.
- › **Advanced Crossdock Planning** – Move goods straight from receiving to shipping to match demand with supply already in the pipeline.

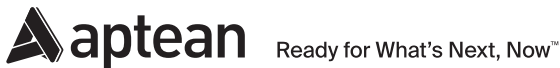

## Key Benefits

- › **Improve Productivity and Decrease Costs** – Aptean WMS Labor Management (LM) calculates baseline productivity, monitors and optimizes individual workers' performance and time standards, monitors workers' progress toward goals and identifies improvement areas.
  - › **The Right Carrier at the Lowest Cost** – Aptean WMS Transportation Management System (TMS) identifies the best routes and rates and build loads for maximum efficiency.
  - › **Minimize Travel Time** – Dynamic Route Planning (DRP) automatically determines the optimal route for pickups and deliveries, minimizes travel time, and considers weight, volume and timing preferences.
  - › **Reduce Labor Costs and Improve Fulfillment** – Slotting improves fulfillment rates by placing products in the most effective locations. Placement can be based on demand, historical consumption trends, dimensions, weight and other item and location attributes.
  - › **Improved Supplier Communication** – Supplier Link improves receiving process efficiency by allowing your suppliers to create advanced shipping notices (ASNs), print UCC labels, view purchase orders, enter shipment quantities, create mixed-SKU cartons and more.
  - › **Easily Track Supplier Performance** – A reliable electronic auditing procedure to verify suppliers' ASN processes and monitor ASN data accuracy against actual shipment contents. Track supplier accuracy over time, identify the most accurate suppliers and even reduce the frequency of audits for trusted suppliers.
  - › **More Efficient Scheduling** – Manage appointments for your warehouse yard and dock doors. When a trailer is checked into the yard, the system can match the trailer to an existing appointment and direct it to the matching dock door.
