Aptean Analytics for Aptean Industrial Manufacturing ERP

Simplifying Complex Enterprise Data

Seeing Your Business In Action

How can you take a seemingly infinite amount of information and derive meaningful insights? Aptean Analytics set out to do just that.

Aptean Analytics delivers industry-specific dashboards built for Aptean Industrial Manufacturing ERP *Made2Manage Edition*. Easily identify issues related to profitability, planning, manufacturing, quality, purchasing, inventory, sales and delivery. Conduct searches for specific information and interact with dynamic dashboards and analytics. You'll be able to navigate your data freely since there are no predefined or fixed drill-paths. In fact, changes and customizations can be made easily—allowing you to discover data insights on the fly.

Data is only good if you can use it effectively. This sounds straightforward but discrete manufacturers understand the underlying importance in this message. The challenge is to take a seemingly infinite amount of information and translate into trended views of meaningful business Key Performance Indicators (KPIs). This representation of the data enables business decision makers to gather insights and to make well-informed decisions quickly to reduce costs, lower inventory, improve productivity, raise profits, and increase competitiveness.

Powered By QlikView

Aptean Analytics is powered by the industry-leading QlikView platform, deployed by more than 30,000 customers across the globe. Aptean Analytics drives real decisions by providing actionable insight with the Associative Discovery capability.

Actionable insights are driven by the Associative Discovery capability. Using this, Aptean Analytics digs quickly into data from virtually any source and identifies relevant correlations. Then, your associated data is identified by dynamic color-coding. This process allows you to quickly find insights much faster than traditional Business Intelligence (BI).

Discrete Manufacturing Specific Dashboards

Aptean Analytics delivers standard out-of-the-box dashboards focused on discrete manufacturer needs, taking away the complexity that has plagued many traditional BI solutions of the past. The standard dashboard ties in all aspects of the business such as sales, production, quality, inventory, finance and delivery. Dashboards can also be easily tailored to display unique metrics specific to your requirements. With user-friendly charts, tables, dashboards and other visuals, Aptean Analytics eliminates ambiguity. You're left with a clear picture that makes it easier to guide decision making.
Scalable

Scaling up or down with Aptean Analytics is easy. In fact, the process is done automatically so you never have to worry about any relationships between existing and new datasets. Quite simply: as the database scales, the solution's capabilities scale as well.
