

The Aptean Cloud for Aptean
Food and Beverage ERP

Modernize your business with enhanced security

Integrated data and mobility exclusively for food companies

The Aptean Cloud provides a complete solution built specifically for food manufacturers and food distributors, and backed by the security, flexibility and scalability of a SaaS model. We deliver the capabilities you need without the challenges of a traditional on-premise deployment.

- ▶ **Reduced Costs** – Remove the high cost of hardware and labor that come from running your own data center, and avoid unplanned expenses with defined, predictable costs.
- ▶ **Access Anywhere** – Provide your users with greater flexibility by enabling them to access your ERP securely, wherever they have an internet connection.
- ▶ **High Availability** – Always on, always available – Aptean's SLA guarantees 99.9% uptime via the Microsoft Azure platform.
- ▶ **Increased Security** – Your solution is accessible through our secure and monitored online environment for maximum protection against a breach of your data.
- ▶ **Disaster Protection** – Your data is backed up, and always available even if your facilities suffer from a natural disaster, hardware failure or other unfortunate event.
- ▶ **Support Growth** – Our scalable model allows you to dynamically add computing power and capacity as you grow, instead of paying now for your future needs.

Robust, Secure Hosting for your Aptean Food and Beverage ERP Infrastructure – Powered by Microsoft Azure, the Aptean Cloud delivers the rich features you need in a secure environment that is trusted by 95% of the Fortune 500. All of the information and insights you require are delivered through a complete and compelling user experience allowing you to focus on managing and growing your business

Key Benefits

- › **A Trusted Platform** – Microsoft Azure features embedded security across the broadest global footprint and the largest compliance portfolio, with enterprise-grade SLAs, and industry-leading support. Aptean leverages segmentation and volume encryption to provide you with the highest degree of data security, as well as reliability and flexibility.
- › **Minimize On-Premise Hardware** – A move to the Cloud means fewer costly hardware purchases and upgrades, along with the license costs for database and operating systems. You'll also avoid the high cost of in-house technical expertise to maintain that hardware.
- › **Downtime Loss Avoidance** – When on-premise systems are down it's not just hardware that's not running, it's the whole company. A 99.9% uptime guarantee insures against potentially huge losses including wages and salaries, production downtime, reduced customer service levels and more.
- › **Managed Tech Services** – Experienced Microsoft and Aptean experts handle upgrades, health checks and code deployments to take the burden off your internal IT infrastructure, saving you time, money and resources while reducing risks.
- › **Performance Optimization** – Your system is kept finely tuned for speed and performance so that it can scale without interruption. You benefit from maximized productivity, even as your database and usage grow.

Aptean Food and Beverage ERP

Aptean Food and Beverage ERP is enterprise management software designed exclusively for food companies. From the moment materials and ingredients enter your facilities, until the finished product is delivered, Aptean is there, helping manage every aspect of your business. Aptean connects departments, data and processes, giving you the insight, visibility and control needed to take your business to the next level.
