

Growth Barriers That Can be Solved With Technology

Many roadblocks can impede your path to expansion and success. Manufacturers have identified three critical areas of concern for 2024:

Industry-Specific Software Drives Revenue Growth

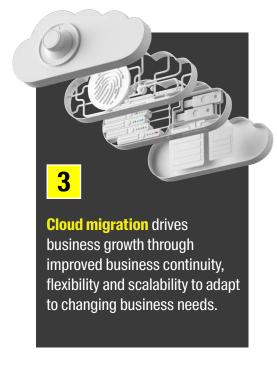

Our research found that discrete and process manufacturing companies that deploy industry-specific technology are realizing greater revenue outcomes than their counterparts who are still dependent on manual processes.

Three Business Strategies for Growth Investment in three key areas unpins strong financial performance.

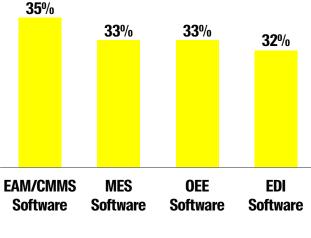

What Are the Next Priorities for Digitally Mature Companies?

the next step is to build on their strong foundations and expand their use of industry-specific software to: Adapt to ongoing challenges such as rising

For manufacturers at the forefront of digital transformation,

- production costs, supply chain disruption and reduced customer demand. **>>** Grow their operational capabilities in key areas like
- production scheduling, inventory management and automated manufacturing processes.
- **>>** Thrive in previously under-prioritized areas like maintenance, operational efficiency and manufacturing excellence.
