

**Supplier Production Monitoring**  
*for Aptean Distribution ERP*

# Keep Your Margins and Your Customers

## Higher Visibility of Supply Production

Being in the dark about what's being done and if it's being done on time is stressful, particularly if you are relying on overseas suppliers. After all, it's easy to control what you know, in your own facility, but the game changes when you're relying on third-party manufacturers.

**Aptean Supplier Production Monitoring for Aptean Distribution ERP puts you in control** by providing deeper visibility into those overseas tasks and ensuring that you're meeting those compliance mandates and informational requirements for all of your supply-side activities.

## Key Benefits

- › **Gain Visibility of Your 3rd Party Production** – Monitors and tracks status, quality assurance outcomes, production dates, shipping schedules, labeling requirements, approvals, retailer compliance mandates and more of all your manufacturing partners.
  - › **Keep Business Process on Task and on Time** – Customize and streamline processes and tasks through your supply chain. Create workflows and rule-based alerts integrated with your business rules.
  - › **Focus on Growth** – Eliminate time-consuming data collection and reporting tasks and use our three data capture options to match your vendors' variable technology abilities and needs. Vendors can update status instantly into your ERP through our supplier portal functionality.
