

Web API for Aptean Industrial Manufacturing ERP  
*Made2Manage Edition*

# Leverage Even Greater Business Logic

## Drive Efficiency and Alignment Across the Enterprise

Web API for Aptean Industrial Manufacturing ERP *Made2Manage Edition* allows you to manipulate, update and share information from outside the standard interface.

As a RESTful API running CRUD (create, read, update, delete) operations, Web API exposes all of the business logic that Industrial Manufacturing ERP has to offer. System administrators and developers are free to create custom reporting solutions, integrate Industrial Manufacturing ERP with other ERPs and more—all while adhering to a standard set of business rules and master control settings.

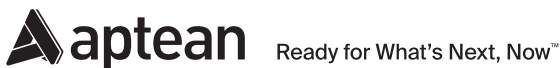

- **Enhanced Customer Experience** – Create a sales portal where customers enter requests for quotes (RFQs) and sales orders, or create an information portal where distributors view order statuses/documentation
- **Easy CRM Integration** – Integrate customer and account data using the current information in your customer relationship management (CRM) platform
- **Simplify Information Sharing** – Is your parent company or subsidiary using a different ERP? Integrate Industrial Manufacturing ERP with their ERP system to align financial, manufacturing, sales, and personnel data across your organizations
- **Improve Multi-Company Processes** – Automate the creation of intercompany arms-length transactions or synchronize Item Masters between companies
- **Integrate Payroll** – Provide time and attendance information from Industrial Manufacturing ERP to your payroll processor, and automate the creation of journal entries
