

Aptean AXXOS OEE

Production Monitoring Solution with Focus on Improvement and Effectiveness

AXXOS OEE is our state-of-the-art production monitoring solution for single- and multi-plant manufacturers. Designed to provide you with a complete picture of your production effectiveness, our solution helps you identify the sources of loss along with areas of improvement. With a strong focus on production follow-up and optimization, AXXOS OEE enables you to locate bottlenecks in production; check asset availability and establish OEE-value (Overall Equipment Effectiveness) per department, machine, article, or order; and find common causes of downtime. AXXOS OEE is available on-premises or as SaaS.

Optimize Production Efficiency

AXXOS OEE connects with your equipment to help build the foundation for a successful improvement process. Robust automatic data collection combined with effective operator reporting creates the consistent and reliable data you need to make intelligent decisions regarding your manufacturing operations.

- **Creating awareness** – Real-time production status, subscription-based reports, and mobile access to production data increases awareness across the factory resulting in improved productivity and more time for value-adding tasks.
- **Facts for well-founded decisions** – With the help of Intuitive BI-tools for quick and easy analysis, you can conveniently see an overview of the production and drill down into the details.
- **Flexibility and mobility** – With a strong mobile solution, you will have complete access to the production status regardless of where you are. You'll be able to easily monitor production problems, status, and disturbances.
- **Operators in focus** – AXXOS OEE puts the operator in focus, allowing him/her to report details of disturbances and utilize tools for maintenance and quality control, helping to bring operations and maintenance closer together.

Benefits

- Improve availability, performance, and quality output with full OEE monitoring
- Increase awareness of production efficiency with real-time visualization
- Access and control factory performance when and where you need to with mobile solutions
- Optimize your improvement process with fact-based decisions
- Secure output and delivery precision with control over the production performance

Key Features

- **Visualization** – Monitor the production status in real-time, either on large displays in the factory, at workstations, or from mobile devices. Timely distributed reports keep your organization up-to-date and prepared.
- **Analysis** – Efficiently analyze production information using powerful and easy-to-use tools. With a few clicks, you can scrutinize information covering all of production or you can drill down to the specific department, machine, order, or product level.
- **Mobility** – Get access to the production status from your smartphone or tablet. Manage the reporting of incidents on-the-go and subscribe to alerts that will notify you of new, relevant incidents. You can have the factory at your fingertips.
- **Easy Follow-Up** – Empower operators to easily register details about the causes of disturbances. By reducing the time for follow-up reporting, operators can instead focus on improvements.
- **Turn-Key Solutions** – Benefit from built-in best practices developed in long-term cooperation with manufacturing customers. Fast implementation leads to quick results and payback on investments.
- **Andon Alerts** – Create awareness and enable timely action on disturbances in production. Management, maintenance personnel, operators, and other employees can subscribe to push notifications– directly to their mobile devices.
- **Operator Maintenance and Quality Control** – Enable efficient maintenance and quality control work. Skip the binders and instruction books. Track upcoming maintenance and immediately report on the performed work from the operator's workstation or a mobile device.
- **Designed for Integration** – The smooth integration with surrounding business, manufacturing and maintenance systems makes re-entry of data unnecessary. Create efficient workflows and maximize the use of your data.
- **Scalable** – With a modular design and support for multiple; sites, time zones and languages, AXXOS OEE supports the specific needs of your organization and grows with you independent of current size and structure.
- **SaaS or On-Premises** – AXXOS OEE as a cloud solution will give you a low total cost of ownership, low risk, high availability and smooth up-grades as well as deployment. If required, on-premises installations will give you the same solid support for your operations.
