

ED6039A

SAFETY DIRECTOR™

ED6000 SERIES

SAE Class I LED Safety Director™

ECCO's ED6000 Series Safety Director™ delivers powerful amber LED warning signals that keep roadside crews and fleet vehicles safe. It directs traffic with left, right and center-out patterns that clearly tell motorists when to move over, while traditional flash patterns provide additional traffic-alert warning. Designed for work trucks, tow trucks, utility vehicles and municipal fleets, the universal mounting design adapts to a wide range of vehicles and installs quickly for immediate use.

Models

PART NO.	BAR LENGTH	CABLE LENGTH	TYPE	ILLUMINATION COLOR
