

## ACCESSORIES

### 3<sup>rd</sup> BRAKE LIGHT

#### Platform Mounting Plate

ECCO's 3rd brake light platform mount is built for durability, even in demanding jobs. It mounts behind the factory's 3rd brake light and bolts to the brake light opening with custom hardware. The factory light is reinstalled over the mount but does not support it. This design suits heavy-duty applications and fits Ford F150 2024 models. It offers a clean look and easy installation, with rubber mounting feet to prevent vehicle damage and no need for drilling. It reliably installs various products on aluminium-topped vehicles, including beacons, remote spotlights, safety directors, and minibars. The lightweight aluminium design ensures secure mounting without wind resistance, vibration, or fluttering.

#### Model

PART NO.	VEHICLE MODEL	COLOUR	TYPE
EZ1000B-FL	2009 to 2024 Aluminum Body F150		LED

#### Features & Benefits

- Incorporates the existing dimension of F150 3rd brake lights without interference or modification to the function of the OEM 3rd brake lights
- Clean-looking and easy-install mount with desirable features such as rubber mounting feet to avoid damage to the vehicle and no need to drill mounting holes
- Easily and reliably mount a number of products to aluminum-topped vehicles including beacons, remote spotlights, safety directors, and minibars
- Industry accepted material and coating designed to prevent corrosion and avoid mechanical and cosmetic issues
- Low-profile lightweight aluminum design coupled with secure mounting to ensure there will not be excessive resistance, vibration or "fluttering"
