TAGOUT-LOCKOUT

Accessory Boxes & Brackets Suits 75930/75910 Series

Enhanced Safety and Security with Lockout Tagout Boxes.

ECCO's, new range of safety switch lockout boxes specifically designed for the new 75930 and the original 75910 Battery master disconnect switch by Cole Hersee. These products have inbuilt security features that prevent tampering or accidental locking "on" of the specific master switch. The new range of safety lockout covers offers enhanced security and safety beyond what is currently available with the switches alone or solutions in the market. It comes in two types, all manufactured with super tough 304 stainless steel and powder coated in industry-standard colours: Red, Yellow and Blue.
