

WORKLIGHTS

E92006-HINV

Illuminates High-Visibility Clothing & Materials

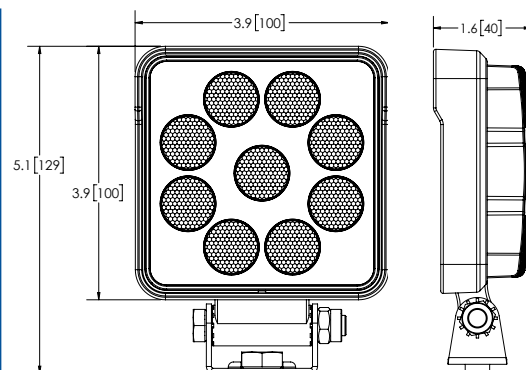

ECCO's E92006-HINV worklight features groundbreaking HINVII™ technology that significantly enhances jobsite safety by actively illuminating high visibility gear such as vests, cones and signage, improving worker visibility in high traffic areas, low light conditions and fog. This LED worklight runs over 80,000 hours of maintenance-free service life with an extremely low amp draw, cutting downtime and upkeep across the fleet. Patented Viz™ technology extends visibility beyond the vehicle itself, protecting crews working roadside and on active jobsites where standard lighting falls short. Built for construction, utility, and commercial service vehicles, the E92006-HINV mounts wherever added worker protection is needed most.

Models

PART NO.	VDC	TYPE	LUMENS (RAW)	AMPS
E92006-HINV	12-24	Flood	24	1.3

Design Features

- Nine 3-watt LEDs
- Highly effective with high visibility materials: safety vest, traffic cones and signage
- Significantly enhances worker safety and job site visibility
- Rugged heatsink housing
- Polycarbonate lens
- Steel mounting bracket
