

# CMiC R12 Integration

Streamline AP payments, control field spending, and enhance job cost reconciliation

## Features

- Seamless, direct integration via API
- All check, ACH, and card payments in a single workflow
- Standalone Corpay Virtual Card option
- Expense Management app, ExpenseTrack, synced with CMiC
- Automated reconciliation processes
- Dedicated Corpay and CMiC resources on-call
- Automated workflows across multiple locations, bank accounts, and hierarchies
- Payment fraud protection with virtual card and managed ACH payments
- Corpay Multi-Card solution to combine all fuel, T&E, and business purchasing

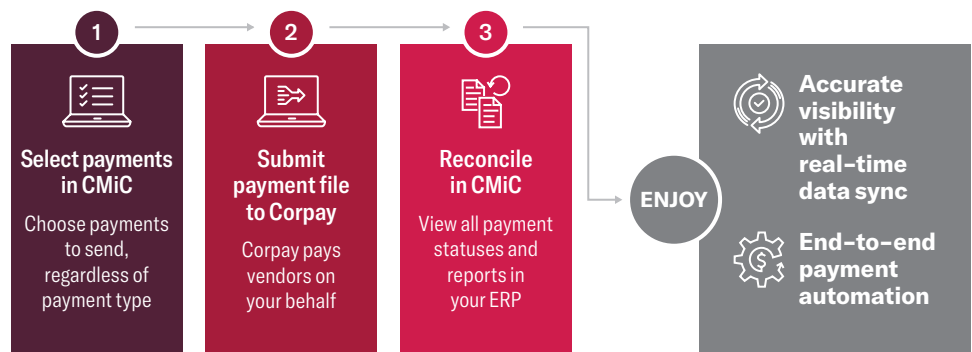

## Digitally streamline your supplier and subcontractor payments

Corpay's nearly two-decade-long partnership with CMiC enables contractors across the country to pay without paper. Our native integration simplifies your AP workflows, enabling you to offload time-consuming and costly manual processes. Continue using the CMiC R12 system while allowing us to shoulder vendor management and enrollment, payment follow-up communications, data storage, and more.

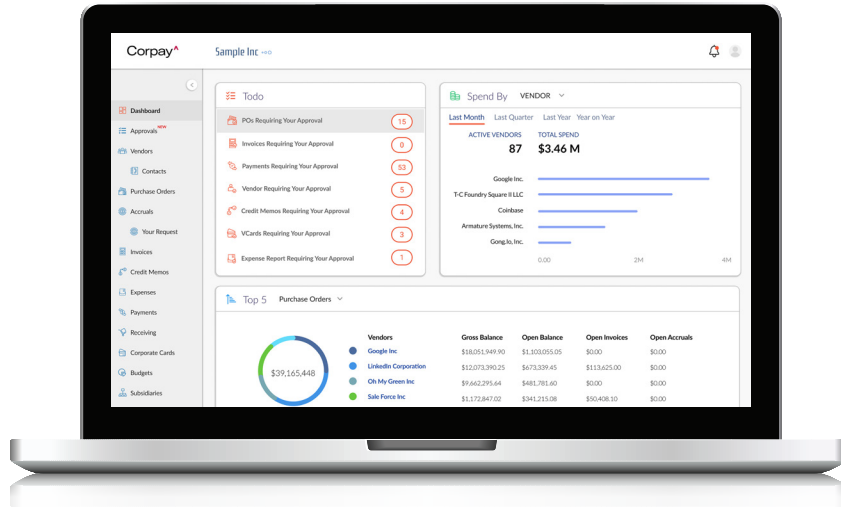

In our goal to provide end-to-end efficiency, through the Corpay Payments Automation API, your firm can consolidate multiple manual processes into one optimized workflow. Whether you're looking to process all payment types — including check, ACH, and virtual card — in bulk, optimize payment methods for your vendors, consolidate purchasing/fuel/T&E card programs, electronically manage jobs costs, or boost your bottom line with cash rebates, we've got you covered.

With our customizable solutions, your firm can count on improved job costing, better tracking of job profitability, and most importantly, an AP process that benefits your business.

### Powerful Payments Designed for Efficiency

By modernizing the way you pay with Corpay and CMiC, your company's AP department can maximize efficiency, mitigate risk, and even become a revenue generator.

# The Future of Construction Payments

## Improve Efficiency

- Streamline your payments on a single electronic payment process for all business payments
- Strengthen vendor relationships with flexible payment options
- Capture and import validated data on a daily basis to simplify job costing

## Reduce Costs

- Eliminate dual entry between multiple disjointed systems
- Generate monthly cash rebates out of your trade payables beyond direct discounts with vendors
- Get rid of paper pileup (and associated costs) from receipts, invoices, and checks

## Mitigate Fraud

- Offload ACH data management responsibilities
- Utilize our portal to store, validate, and maintain sensitive vendor and banking data
- Track spend with real-time data exchange and customized reporting

## Implement Easily

- Enjoy our seamless, native CMiC R12 integration
- Implement within weeks (not quarters) with minimal IT resources required
- Receive 24/7/365 support from our in-house implementation and vendor enrollment teams
