

Improve Accounts Payable Efficiency with Corpay's Sage Intacct ERP Integration

Our Sage Intacct ERP Integration allows you to pay your vendors and reconcile with Sage Intacct, without manually duplicating entries in multiple applications. Our integration can increase the efficiency of your AP team, potentially helping you save time and money. Our solution extends Sage Intacct's capabilities, streamlining your payment delivery, while providing access to 145+ currencies and 200+ countries, robust beneficiary bank validation, multi-level approvals, multi-entity support, the ability to hold multi-currency stored value balances, and strong reporting tools.

The Solution

Do you currently make redundant manual payment entries in your trading platform in addition to your entries on the Sage Intacct platform? This type of manual lifting to process payments for an invoice can be time consuming, and costly, both from the standpoint of your AP department, as well as the lateral costs of the risk of incorrectly entered information which can lead to missing or delayed payments.

Our solution provides an integration between Sage Intacct's platform and our Cross-Border online trading platform. This facilitates the seamless movement of data between the two applications. This integration will allow you to pull invoices from Sage Intacct into Cross-Border and reconcile the payments with Sage Intacct, without the need for manual data entry in two applications.

You will also be able to:

1. Filter the invoices to be pulled from Sage Intacct
2. Exclude individual payments from booking after the import, and
3. Approve or reject individual payments.

You will no longer need to make the same entries in two applications – this can help you save time, and by association, money. Additionally, the integration is minimally labour-intensive on the part of your IT team, meaning we can typically implement the solution within weeks as opposed to months.

Features & Benefits

Increase Efficiency and Save Money

Eliminate manual double entries while processing and reconciling payments by syncing data between Sage Intacct and Corpay

Mirror your workflow by utilizing our robust multi-level approval to collaborate more effectively

Competitive FX rates on more than 145+ currencies
