

LILLY INTERNATIONAL: GEOGRAPHIC FOCUS

Our greatest interests lie in the following areas:

In-Licensing and Co-Development

Oncology:

- Thoracic cancer and breast cancer
- Gastrointestinal: Gastric, colorectal, hepatocellular carcinoma, pancreatic cancer
- Immuno-oncology

Immunology:

- Rheumatoid arthritis
- Psoriasis, psoriatic arthritis, ankylosing spondylitis
- Systemic lupus erythematosus, lupus nephritis
- Crohn's disease and ulcerative colitis

Neuroscience:

- Neurodegenerative disorders: Approaches that affect disease progression or modification and/or address major symptoms of the disease
- Pain and migraine

Diabetes:

- Glucose and metabolic control: Ultra rapid-acting insulins, novel oral anti-diabetic agents, novel insulin sensitizers
- NASH
- Endocrine disorders (e.g., growth disorders)
- Connected product systems: Connected injection devices, analytics platforms that provide actionable insights
