

Filtering your compounds has never been so easy

FILTEX® Extruders

HF GROUP breakthrough technology for easy filtering.

FILTEX® is the counter-rotating parallel twin screw extruder optimised for straining rubber and polymer compounds. The **FILTEX®** requires less specific energy than alternative existing technologies at same conditions. Reach a quick **ROI** based on a reliable process, high throughput and lower operative costs.

Your benefits

- Excellent temperature control
- High pressure build-up based on HF's latest screws & chamber design
- Barrel quickly opened for cleaning
- Machine designed for easy maintenance
- Easy to integrate in mixing line or as a stand-alone-machine
