

GREEN GAS CERTIFICATE

Certificate No. 2026-8369-0002

We hereby confirm
Harburg-Freudenberger Maschinenbau
GmbH
Asdorfer Straße 60
in 57258 Freudenberg

In cooperation with:

Stadtwerke Lemgo

the compensation of CO₂ emissions caused by the use of natural gas in heating systems.

The CO₂ emissions are compensated through the project portfolio of KlimalInvest Green Concepts GmbH. The supported projects are officially registered, follow the rules of the Paris Agreement and are additionally certified according to the strict requirements of the independent and non-profit Verified Carbon Standard Association (VCS).

By using green gas, the compensation of at least 261 tons of CO₂ emissions is achieved for the calculated gas consumption of 1.110 MWh in the period from January 1st 2027 to December 31st 2027.

The volume of CO₂ reductions rights retired includes compensation for upstream chain emissions, which are i.e. emissions that arise from the extraction of natural gas.

The issuance and cancellation of CO₂ reduction is carried out through certified international registers and officially confirmed.
