

Laboratory mixers for laboratories and pilot plants

UMIX[®]-L

HF GROUP universal mixing technology for small volumes and R&D.

UMIX[®]-L is the compact laboratory version of the **UMIX[®]** universal mixer in the proven WP design. With useful volumes ranging from 0.25 to 8 liters, the **UMIX[®]-L** is ideal for preliminary testing of formulations, process development, and small batches. Thanks to temperature-controlled mixing chambers, speed-controlled drives, and practical mixing geometries, the **UMIX[®]-L** enables meaningful trials under reproducible conditions and supports informed decisions on the path to production readiness.

Your benefits

- Proven WP design for realistic laboratory tests
- Ideal for preliminary recipe testing and process development
- Reproducible mixing and kneading processes
- Temperature-controlled mixing chamber
- Compact design and easy operation
- Different discharge types and optionally interchangeable mixing chambers
