

Proven design with extended functionality

TECNOLAB® Mixing Mills

HF's new technology for laboratory tests and small batch production.

The new generation of **TECNOLAB® Mixing Mills** combines a proven design with a large number of new features, bringing a high degree of automation, variability and enhanced operator's comfort for a wide range of applications. Those include compounding and testing of various materials for development and production of additives, technical rubber goods, tyres, and many more.

Your benefits

- Modular and compact design
- Automated mixing procedure, nip adjustment & stock side guides
- Intelligent sensing of compound temperature, thickness & amount
- Integrated cutting assembly, sample cutter & scale
- Easy machine operation
