

# Public road upgrades and changes to traffic conditions

April 2024

Public road improvements will be undertaken between April and June 2024 to upgrade the traffic corridor which will be used to transport larger turbine components to site.

Over the coming months you can expect to see some changes in traffic conditions as road improvement activities are undertaken in the local area. Upgrades include widening of intersections and roads.

## What you can expect

- Traffic management staff and signage will be in place as required to ensure safety and continued access for all road users. Some temporary delays can be expected.
- Some works being undertaken may occur outside of normal work hours. Timing will be phased to minimise impacts on neighbours.
- Some works may require relocation of telecommunication infrastructure resulting in temporary interruptions.

## Stay in touch

You can sign up for project news by visiting [www.wambowindfarm.com.au](http://www.wambowindfarm.com.au) or follow us on Facebook.

If you have specific questions or concerns please reach out to our team on 1800 490 475 or email [info@wambowindfarm.com.au](mailto:info@wambowindfarm.com.au).

## Where road works will be happening

### Map Legend

- Project boundary
- Stage one wind turbines
- Stage two wind turbines
- Public roads
- Heavy vehicle approved transport route
- Substation / switchyard
- Construction compounds
- Blade laydown areas

## Stage Two construction works begin

Construction works on Stage Two will begin in April, starting with expansion of the existing site office compound and preparation of laydown areas. Trenching, electrical cable laying and backfilling works will also continue.

As works for Stage Two get underway, there will be an increase in construction-related traffic on surrounding roads as our teams deliver equipment and materials to site. All project heavy vehicles are to use the approved public road route (shown above).

**We value road safety** and ensure our contractors and drivers operate safely within the approved transportation route.

We encourage you to contact us on 1800 490 475 to report any unsafe driving or other concerns.

**Stage One progress:** 29 of 42 turbine foundations for Stage One are now complete. Foundation pours continue in April.

## Connect for coffee and a chat

Our next drop-in session will be at Wombat's Cafe & Grill in Jandowae on **Thursday 16 May** from 8am until approximately 11am. Come and say hello to our team - coffee is on us!
