

September 2024

IMPORTANT NOTICE: Transportation of wind turbines to commence

The transportation of wind turbine components from the Port of Brisbane to the Wambo Wind Farm site is anticipated to begin in late September. These over size, over mass (OSOM) deliveries will take place overnight to minimise the impacts on other road users.

What you can expect

- > A **test run** is currently scheduled to take place between 30 September and 2 October. Subject to successful completion of the test run and necessary approvals being issued, regular deliveries will commence shortly thereafter.
- > Deliveries will depart from the Port of Brisbane no earlier than 10pm, and all OSOM transport vehicles must be **off road by 7am** the next morning.
- > Transport vehicles are expected to travel through the Jandowae/Diamondy area between 5am and 6.30am.
- > Once regular deliveries commence, they will operate up to six nights per week subject to weather, resource availability and permitting conditions.

Talk to our team

The Wambo Wind Farm team will be at Wombat's Cafe & Grill on **27 September 2024** from 8am to 11am. No RSVP required - please drop in with any questions or concerns. Coffee is on us.

Delivery Route

OSOM turbine component transport vehicles will travel from Dalby to site via:

Warrego Highway

Volker Street

Dalby-Jandowae Road

Hickeys Road

Jandowae East Road

Kingaroy-Jandowae Road

Niagara Road

Woolletts Road

Diamondy Road

Mount Piper Dodge Road

About wind turbine deliveries

The transportation of wind turbines to the wind farm site is a big logistical undertaking.

Each complete turbine consists of eight tower sections, three blades, nacelle, hub and drive train and will require thirteen loads in total.

Once the regular delivery schedule is established, it is anticipated that two complete turbines will make the journey from the Port of Brisbane to Diamondby each week.

Each OSOM load will be accompanied by police escorts and pilot vehicles.

Deliveries typically will not occur on Sundays or public holidays. The delivery schedule will also be subject to change to accommodate special events, availability of equipment and personnel, and weather conditions.

Wambo Wind Farm turbines are currently stored at Port of Brisbane, ready for transportation.

The safety of all road users during turbine transportation is of utmost importance. We value safe and respectful driver behaviour at all times, and ensure our contractors and drivers operate safely within the approved transportation routes.

We encourage you to **contact us** on 1800 490 475 to report any unsafe driving or other concerns.
