

Lightness

CHAIR

Design Samuli Naamanka

The Lightness family of chairs is focused on functional design with carefully finished details. Lightness chairs are ecological, award-winning furniture awarded with Nordic eco-label.

The Lightness chairs are known for their versatility, being light in weight, yet sturdy, as well as easy to stack. Available both with or without upholstery as desired.

Dimensions

Width	490 mm
Depth	480 mm
Height	790 mm
Seating height	450 mm

Lightness B

CHAIR WITH LOOP LEG BASE

Datasheet

The strengths of the Lightness B chair are functionality, stylish design, finely honed details and robust structure. The wide selection of materials and colours, upholstery options and excellent stackability ensure that the Lightness B chair is perfect for every space from offices and conference halls to learning environments.

The Lightness B chair with loop leg base can be linked by the pads. The pads are available as sleek or felted.

Material

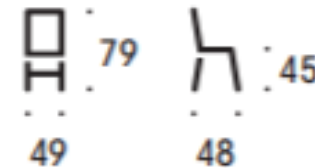

Seat and backrest

The surface materials are

- Birch or beech veneer
- Stained beech veneer
- Technical veneer (LN birch, birch natural colour, LSG deadwood grey, LMG dark grey, LPLY veneer) or
- Laminate: black, white, light grey, dark grey, birch and oak

Frame is either chrome or powder coated steel (graphite, silver, black or white as standard colours).

Fabric upholstered seat and/or backrest are available.

More information

The chairs are stackable, 12 chairs on the floor and 25 on the chair trolley. The product family includes also a designed-for-purpose chair trolley.

Lightness C4

CHAIR WITH 4-LEG BASE

Datasheet

The strengths of the Lightness C4 chair are functionality, stylish design, finely honed details and robust structure. The wide selection of materials and colours, upholstery options and excellent stackability ensure that the Lightness C4 chair is perfect for every space from offices and conference halls to learning environments.
