## WORK CHAIR

Design Juha Lätti

Isku Step+ is a series of high-quality office chairs for professional use. A properly chosen office chair increases work efficiency and comfort in the workplace. Isku Step+ office chairs are unique in terms of ergonomics and design. The user can choose the size of seat and back that best suits his or her work, according to users own dimensions and preferences. Two choices of softness of the seat; normal or soft. Available as an antimicrobial.

## WORK CHAIR

### Datasheet

Thanks to the free-float mechanism, the seat and backrest follow the movements of the body completely independently of each other. The resistance is set according to the user's weight by adjusting the spring. Free-float mechanism can be locked steplessly.

Depth and height adjustment. Backrest height adjustment. Regular or soft seat. Step + office chairs can be equipped with optional adjustable 3D 360° armrests (black or ALU). A clothes hanger is available as an optional accessory for backrests 4 and 7. The standard semi-soft castors can be replaced with hard castors. Step+ office chairs are also available as ESD versions, these must be upholstered with a conductive ESD fabric (for example, Global ESD). Available antimicrobial.

Example models:

Step+ F22

Step+ F23 + armrest

Step+ F24 + armrest

Step+ F26+ armrest

Step+ F37C + armrest + coat hanger (C= lumbar support)
