Workhuman for Microsoft Teams

Bring top-rated recognition into your daily workflow

Introducing Workhuman for Microsoft Teams

With the Workhuman® app for Microsoft Teams, built by the world's #1 provider of recognition software, you can engage and reach your employees with the power of recognition, no matter when and where they work. Equip and inspire your employees to send recognition in the moment it occurs, resulting in timely recognition embedded in the flow of work and grounded in collaboration, performance, and meaningful company values.

Features

Instant recognition: Empower employees to send in-app recognition nominations via Teams meetings, chats, and channels, and let managers approve nominations right in the app.

Vibrant community experience: An interactive homepage welcomes your employees with daily inspiration and motivation by showcasing and celebrating professional contributions as well as Service Milestones®, Life Events®, and Community Celebrations®.

Secure deployment: Workhuman for Microsoft Teams can be installed in roughly 30 minutes and deployed in seven easy steps. Plus, clearly defined permissions and controlled privileges reinforce your information security and privacy.

AI-powered tools: Leverage embedded, AI-powered tools like the Award Advisor and Inclusion Advisor to enable employees to send their coworkers meaningful, impactful awards and messages that align with your company's cultural values.

Expand the reach and increase the impact of recognition

Workhuman for Microsoft Teams embeds your organization's recognition program directly into the Teams environment where your employees are working, meeting, and collaborating every day. This seamless integration eliminates the friction that otherwise limits recognition program usage and drives alignment between recognition activity and company values.

The integration is designed to encourage recognition within an employee's natural workflow, leading to the following outcomes:

Universal recognition engagement.

In-app nominations via Teams meetings, chats, and channels stimulate in-the-moment recognition activity that ensures every contributor is properly recognized.

More data for impactful action.

Recognition via Microsoft Teams increases the frequency, timeliness, and relevancy of recognition activity, so leaders and executives are equipped with more data and insights. Leverage that Human Intelligence™ data to best understand your programs, how your employees engage with them, and how you can continue to evolve your culture of recognition.

Enhanced employee experience.

Instead of being inundated with meeting invites and project notifications, Teams users experience inspiration and motivation as they interact with a vibrant homepage dedicated to celebrating the professional and personal achievements taking place around them. Experience the guaranteed ROI of your recognition program as it drives productivity, reduces turnover, and enables companywide celebration.

“If we can highlight our team members that are making an impact in the organization in one more channel, we are going to do it.”
