

Jonathan Hyland

Chief Technology Officer

Vision

I am a voice of designing technology for human connections in the workplace, ensuring that the solutions we create are not just functional but invoke emotion. We are more than just leaders in the HR space as our credentials allow us the opportunity to shape technology. Leading digital transformations aligns teams to a larger vision, while accelerating product platforms and growing the business.

We constantly challenge ourselves to be ruthlessly efficient at scaling our technology and leveraging our platform to help startups grow into globally recognized heavy hitters. Innovation means seeing things out of the ordinary; taking things that already exist and bringing them together in a way that the sum is greater than the individual parts.

Expertise

- Advising innovation in technology/architecture
- Expanding Workhuman's growth and momentum
- Being a voice for digital transformation
- Seeing employer brand through the lens of technology

Biography

Joining the company in 2001, Jonathan directs Workhuman's IT architecture, systems, and client implementation initiatives and leads a dynamic and innovative technical team in Dublin. Prior to Workhuman, he had more than a decade of international experience in IT management and held consulting roles for technology companies, including Versatel (Netherlands) and Esat Telecom.

Speaking topics

- Workhuman Company Story
- ROI of Recognition

Jonathan Hyland

Jonathan holds a Master of Science in Electronics, Computers, and Telecommunications Engineering and a First Class Bachelor of Science (Eng) in Electronics, Computers, and Telecommunications from Trinity College in Dublin. He is also an associate members of the IEE.

The opportunity for recognition should never be limited. Sales or IT, HR or Accounting, all contributing employees should have an equal chance to be recognized for their talent and their effort.
