

# PARTICIPATE IN AGING RESEARCH

**Healthy participants between the ages of 55 and 85 are needed for research on healthy aging and the brain.**

**Participants will be compensated**

## Frequently Asked Questions

### ***What happens during my sessions?***

You will go through an MRI scan, cognitive testing, and a blood draw.

### ***Where does this take place?***

This study will take place at the Center for BrainHealth in Dallas.

### ***Will my information remain confidential?***

The study team will follow all applicable laws to ensure your identity remains confidential.

### ***What if I no longer wish to continue to be in the study?***

You are free to stop your participation in this study at any time, with no loss of benefits to which you are otherwise entitled. If you want to stop participation in the study, simply notify the experimenter with whom you are working.

## Magnetic Resonance Imaging (MRI) information

Functional MRI is a noninvasive technique that does not cause discomfort. Unlike X-rays and CT scans, fMRI does not involve exposure to any radioactive material. We do not use any tracers or contrasting dye.
