

CENTER *for*
BRAINHEALTH®
THE UNIVERSITY OF TEXAS AT DALLAS

STEPHEN WHITE, JD

CHIEF OPERATING OFFICER

Stephen White is Chief Operating Officer of Center for BrainHealth®, a translational research center of The University of Texas at Dallas.

With more than 15 years of experience as an executive in commercial healthcare products and service, combined with experience as a commercial attorney and CPA, Stephen White joined the Center for BrainHealth to lead its commercial operations and help bring science-based innovations, technologies and strategies to the public.

Previously, he served as Vice President of Global Sharing Solutions for Leica Biosystems, a Danaher Life Sciences company, and helped commercialize innovative digital pathology solutions to improve patient access to subspecialty expertise. Steve was also head of Corporate Development and General Counsel for Aperio Technologies before Danaher acquired Aperio in 2012.

Before moving to the corporate world, Steve had almost 20 years of experience in private legal practice in Arizona, partly as Senior Counsel at Squire, Sanders & Dempsey, before opening his own practice focused on health care and specialty finance. Prior to that, Steve practiced as a CPA and business consultant for the audit team at Coopers & Lybrand.
