

FRIENDS OF BRAINHEALTH RESEARCH GRANTS

A UNIQUE OPPORTUNITY FOR EMERGING RESEARCHERS

Grants from Friends of BrainHealth support new, independent projects from emerging researchers, shaping careers in brain health through new studies that have the potential to impact countless lives.

Research grants are awarded at the master's, doctoral and post-doc levels. A connection to brain health is key, and eligible study areas are NOT limited to neuroscience

Interdisciplinary proposals are encouraged.

2023 competitors with event sponsor Ramona Jones

FRIENDS of
BRAINHEALTH®

Since 2008, Friends of BrainHealth donors have raised more than *\$4.3 million* and launched dozens of cutting-edge cognitive research studies, exploring new ways to enhance, protect and restore brain health across the lifespan.

Friends grants provide critical, early-career support, inspiring a new generation of scientists and the next era of transformative brain health breakthroughs.

To be notified when the *2025 application period opens in January*, please scan the QR code below and fill out an interest form.
