

ONE PILL. ONE LINE.

THINK TWICE.

Fentanyl has changed everything:
No warnings. No second chances.

The "Xanny" at that party?
Could be a fake made with
potentially deadly
amounts of fentanyl.

Fake pills look exactly
like real ones.

Cocaine and other
powders are showing
up with fentanyl in the
mix, too.

**WHAT'S
HAPPENING?**

That "Addy" from a
friend? Same.

No way to tell which ones
contain fentanyl.
