

ONE PILL. ONE LINE. **THINK TWICE.**

Fentanyl has changed everything:
No warnings. No second chances.

WHAT'S HAPPENING?

The "Xanny" at that party?
Could be a fake made with
potentially deadly
amounts of fentanyl.

That "Addy" from a
friend? Same.

Fake pills look exactly
like real ones.

No way to tell which ones
contain fentanyl.

Cocaine and other
powders are showing
up with fentanyl in the
mix, too.
