

**ONE PILL. ONE LINE.**

**THINK TWICE.**

Fentanyl has changed everything:  
No warnings. No second chances.

The "Xanny" at that party?  
Could be a fake made with  
potentially deadly  
amounts of fentanyl.

Fake pills look exactly  
like real ones.

Cocaine and other  
powders are showing  
up with fentanyl in the  
mix, too.

## **WHAT'S HAPPENING?**

That "Addy" from a  
friend? Same.

No way to tell which ones  
contain fentanyl.
