

WORKS IN MINUTES AND LASTS ALL DAY*

Looking for *fast, long-lasting* heartburn relief?
Turn to PEPCID®

Use product only as directed.

PEPCID® WORKS DIFFERENTLY

PEPCID® is a histamine-2 blocker (H2 blocker). See how it compares to other types of over-the-counter (OTC) heartburn treatments. Ask your healthcare professional which treatment may be right for you.

	 H2 blockers PEPCID®	 Antacids	 Proton pump inhibitors (PPIs)
What do they treat?	Unexpected heartburn	Unexpected heartburn	Frequent heartburn
How do they work?	Reduce acid production by blocking histamine receptors	Neutralize existing stomach acid. Do not stop stomach from producing more acid	Suppress acid release by shutting down acid pumps
How many pills do I take? (Adult dosing)	1 tablet	2 to 4 tablets	1 pill every day for 14 days
When do they start working?	Start working in 15 to 30 minutes	Start working in seconds	Not intended for immediate relief. Can take up to 1 to 4 days to become fully effective†
How long do they last?	Control acid up to 12 hours*	Last up to 2 hours	Can last up to 24 hours (when taken once daily for 14 days)
Can they prevent heartburn?	Can prevent heartburn†	Cannot prevent heartburn symptoms	Not indicated for immediate heartburn prevention

*Starts to work in 15 to 30 minutes. Lasts all day based on 8-hour symptom relief studies during the day. †Based on 9-hour acid control studies during the day and 12-hour acid control studies during the night. Acid control does not imply symptom relief. ‡PEPCID AC® and Maximum Strength PEPCID AC® can prevent heartburn when taken 15 to 60 minutes before a meal. §Some people get complete relief of symptoms within 24 hours.
