# Going digital Guidance for General Dental Practice

Dr. Michaela Sehnert, Dr. Joshua Austin

15 December, 2021

Digital Excellence Series: [www.itero.com/des](http://www.itero.com/des)

## Digital Excellence Series. Top tips from today's speakers

Dr. Joshua Austin	Dr. Michaela Sehnert
1. Scan every new patient.	1. Go digital, it never was so easy
2. Review the scan with the new patient as part of your comprehensive exam.	2. iTero; not only an impression machine.
3. Utilize Time Lapse to track things like wear and recession.	3. Seeing is believing, not only for your patients, also for yourself.
4. Utilize NiRi to diagnose incipient interproximal lesions that are difficult to see on bitewings.	4. Facilitate and speed up your workflow.
5. Occlusalgram can help patients understand their malocclusion easily and quickly.	5. Offer your patient the kind of education and visualization they need to fully understand need of treatment and/or prevention.
6. Take the time to mark your margin on your restorative cases to give the lab the best information possible for constructing your restoration.	6. Delegate! The digital workflow allows that more than ever.
	7. Work more precisely and accurately by digitalizing your processes and treatments.
